

## FreeFlo Plus™

### Fluid Recovery System for Acidizing and Fracturing

#### Description

FreeFlo Plus is an environmentally friendly, microemulsion additive that maximizes treating fluid recovery and improves post-treatment production.

#### Applications

- Fracturing and matrix acidizing of sandstone reservoirs, shales, and coalbeds
- Remediation to remove water blocks, oil blocks, and polymer damage

#### Benefits

- Up to 50% higher post-treatment production
- Improved recovery rate and total recovered volume of aqueous stimulation fluids
- Environmentally friendly

#### Features

- Improves relative permeability of gas reservoirs
- Improves penetration of injected fluids
- Reduces injection friction pressure 10–20%
- Can be used in all types of aqueous treating fluids, including brines, gelled fluids, foamed fluids, and acids
- Can be used in any gas-bearing formation
- Biodegradable

#### Specifications

Appearance . . . . . Clear liquid  
Specific gravity . . . . . 0.97  
Flash point . . . . . 61° C (143° F)  
Solubility in water and brine . . . . . Soluble
